EXIT POP-UP GENERATOR

WHAT IS A POP-UP :

A Pop-Up Is A Graphical User Interface (GUI) Display Area, Usually A Small Window, That Suddenly Appears ("Pops Up") In The Foreground Of The Visual Interface.

It Is No Longer A Secret That Animated Widgets Like Exit Popup And Sliding Block Help To Increase The Response Rate. You Can Use Such Widgets To Increase The Opt-In Conversion, Encourage Users To Click On An Offer, Or Suggest Other Articles To Your Blog Readers.

The Question Is, How Do You Create These Widgets?

A User-Friendly Widget Editor

If You Have Experience With Graphic Software Like Photoshop, You Will Find The Interface Of The Widget Editor A Bit Familiar. Every HTML Element Has Its Own Layer. To Design A Widget, You Simply Have To:

- ⇒ Add The Elements (Such As Text, Link, Background, Image, Button And Input Field),
- ⇒ Style Them By Simply Changing The Parameters,
- ⇒ Move Them To Position, Any Position!

The Widget Editor Also Comes With Some Cool Features.

EXIT POP-UP GENERATOR

- ⇒ You Can Lock The Elements And Move Them Simultaneously,
- ⇒ Move The Elements Using Mouse, Keyboard Arrows Or By Entering The Values,
- ⇒ Drag And Resize Elements (For Selected Elements),
- ⇒ Add Embedded Videos And Social Plugins Through The Use Of Iframes,
- ⇒ Import Form Details From Most List Management Providers Such As Aweber And Mailchimp,
- ⇒ Add ID And Class To The Elements For Advanced Styling And Js Actions.

We Try To Make The Editor Easy To Use For Novice, Yet Powerful Enough For Advanced Programmers.

2) A Powerful Animation Editor

After You've Designed Your Widget, You Can Then Add Animation To It And Make It Animate On Certain Event.

For Example, You Can Set The Widget To Popup When Users Attempt To Exit The Browser.

Or

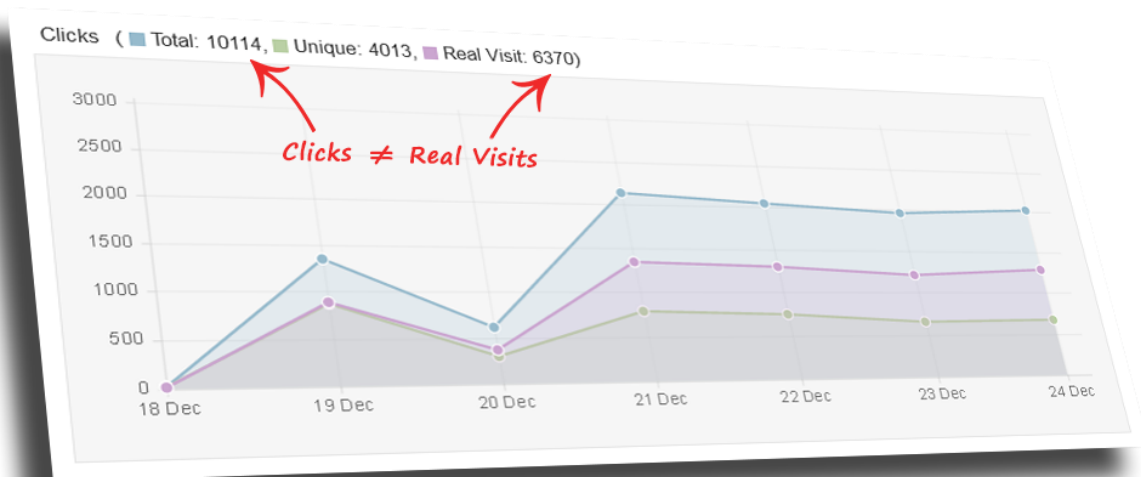

You Can Make The Widget Vibrate When It Comes In View.

EXIT POP-UP GENERATOR

There Are Many Different Animation And Event Options. It's Up To You To Mix And Match.
